

# **The Real Rev-Share Money**

**Where it is and Why you *Might* Be Missing Out.**

For many people involved in any revenue sharing (AKA Rev-Share) business their primary concern is gaining their rev-share income. Clicking on the allotted number of sites in order to qualify for their slice of the revenue.

If this describes you then you are missing out on where the real money is.

And where is this 'real money'? You may ask.

It's in YOUR advertisement / offer / promotion / capture page.

*By the way, if you are one of those who are using your affiliate link to promote the rev-share company you are in as your link to qualify for your slice of the revenue STOP DOING THAT...IMMEDIATELY! You are wasting money.*

Don't know where to find a product to promote?

Go to [www.clickbank.com](http://www.clickbank.com) set up your account and pick a product from there that fulfils the following criteria.

- 1) Has a fast loading, attractive sales page.
- 2) Has a high conversion rate (sells well).
- 3) Pays high commissions, that way you will earn more.

Or you could register for Amazon's affiliate program Amazon associates and promote physical products.

Then do some research to identify who the buyers are. Find the target audience for the product you are promoting.

Some research sites you can use:

[www.quantcast.com](http://www.quantcast.com)

[www.alex.com](http://www.alex.com)

Not all Rev-share companies give you the ability to dig deep to target your viewer audience. Though some companies do allow you to buy targeted traffic without rev-share, such as [Traffic Monsoon](#).

One new Rev-Share platform, which is also linked in with a social networking site, allows you to target rev-share traffic based upon:

- Gender.
- Country.
- Language.
- Age grouping.

This company is [FutureAdPro](#) which is the advertising platform for the social networking site which pays it's members, **\*\*[futureNet.club](#)**.

Though earning from Revenue share is excellent if you are not using your promotional link correctly you will be losing out on the big money.

Just think how much money you could make by building your niche list, or by driving effective, quality and hungry traffic to a product purchase link?

So don't just use any old link to promote just to qualify for your cut of the revenue share. Use the revenue share and exchange traffic to test which landing pages or products convert best.

Once you've determined which work best and you've tweaked, where possible, for the very best results then you should consider using the paid (non-revenue share) traffic to boost your results even further.

\*\* Use the links in this document to add the FutureNet platforms to your income streams to gain access to my viral 9 point success check list and grow your business faster and stronger.
